Discover the DQE Difference

Experience unparalleled customer service and technical expertise

We're not just another Service Provider. We're your trusted local partner — driving your business forward with secure, reliable, and lightning-fast network solutions.

Internet
Five tiers of Internet service depending on your business's needs. Accomplish multiple tasks simultaneously with 100% symmetrical upload/download speeds.

Metro Ethernet
Extend your Ethernet LAN over DQE's MPLS network with speeds from 10 Mbps to 100 Gbps and unparalleled reliability due to our custom redundant ring configurations.

Dark Fiber
Light up DQE's fiber with your privately owned network components, where you maintain direct operational control of your network at a fixed cost.

SD-WAN
SD-WAN can be integrated into existing network infrastructure as flexible, scalable way for you to manage your business network traffic across multiple sites.

Colocation
State-of-the-art facilities that access DQE's fiber network and use 24x7 multi-tier card access systems to protect your business data.

Wavelength
Utilizes optical switching to transmit multiple signals through one pair of DQE fibers, supporting bandwidth-intensive business applications.

Cloud Solution
Improved performance, reliability, and security connections to top-tier Cloud Service Providers such as Amazon Web Services and Microsoft Azure / Office 365.

Guest Wi-Fi
Provides Internet access for your guests and customers separate from your business' primary network, adding a layer of privacy to your network.

DDoS Mitigation
Peace of mind security solution to protect your network from disruptive and compromising Distributed Denial of Service (DDoS) attacks.

*Add to DQE Internet services.

Wireless Backup
Keeps your business moving in the event of a service disruption, providing a seamless transition to customer-controlled priority applications.

*Add to DQE's Internet services or SD-WAN.
